

MD Bond and Mortgage Fund

Management Report of Fund Performance (June 30, 2011)

Series A and Series I

Results of Operations

For the six-month period ending June 30, 2011, the MD Bond and Mortgage Fund ("the Fund") generated a total return of 1.4%. The acceleration of the Consumer Price Index and core inflation in Canada was largely viewed as transitory by the Bank of Canada and the financial markets. The Bank of Canada's overnight lending rate remained at 1.00% throughout the first half of 2011, and Government of Canada short-term and mid-term yields ended the six-month period below the levels at the start of the year. Foreign investors in search of safety and additional yield maintained a high demand for Canadian debt and helped prices for Canadian fixed income securities to appreciate during the first half of the year.

The Fund began the year with a longer duration than the DEX Short-Term Bond Index benchmark as the interest rate risk from rising debt yields on the short-term end of the bond yield curve was deemed to be low. During the first six months of 2011, the relative duration of the Fund was reduced to mitigate the risk of a resurgent economy and a corresponding rise of short-term interest rates. Relative to the benchmark the Fund was slightly underweight in short-term bonds and held an overweight position in medium-term bonds.

The Fund maintained more than half of its holdings in corporate bonds throughout the first six months of the year. Despite credit spreads widening in June 2011, the six-month return for the DEX Corporate Short-Term Bond Index outperformed the DEX Government Short-Term Bond Index by 0.61% due primarily to the additional yield offered by corporate bonds. This active allocation decision was a positive contributor to the total return of the Fund.

As at June 30, 2011 the total net asset value of the Fund was approximately \$356 million, a decrease in the net asset value of 1% since the beginning of the year. The decline in net asset value was largely attributable to net redemptions from unitholders. The Fund's operations contributed positively and revenues and expenses were similar to the same period last year.

Recent Developments

Strategic Changes

There were no strategic changes to the Fund during the first half of the year. The Fund continues to be managed in predominantly a top-down manner, with the Fund continuing to hold an overweight in the high-quality investment-grade corporate bond sector. The average term of the Fund may be lengthened or shortened based on the Investment Sub-Advisor's analysis of future interest rate direction.

Related Party Transactions

MD Physician Services Inc. is the Manager, Registrar and Trustee of the Fund. As Manager, MD Physician Services Inc. manages the overall business of the MD Funds and is responsible for: setting investment objectives, providing and/or retaining the services of third party service providers for fund accounting services, administration services, and promoting the sales of the MD Fund's units.

As Registrar, MD Physician Services Inc. tracks the owners of units of the MD Funds, processes purchase, transfer and redemption orders, issues investor account statements, and issues annual tax reporting information.

As the Fund is organized as a Trust, investing in the Fund means purchasing units of the Trust. As Trustee to the Fund, MD Physician Services Inc. holds actual title to the property in the Fund—the cash and securities the Fund invests in—on behalf of the unitholders.

The principal distributor is MD Management Limited. As principal distributor, MD Management Limited markets the units of the MD Funds through its offices across Canada. MD Management Limited is owned by the Fund Manager, MD Physician Services Inc., which is owned by CMA Holdings (2009) Inc.

Management Fees

MD Physician Services Inc. provides the Fund with investment management and administrative services, including fund accounting and unitholder record-keeping. In return, MD Physician Services Inc. receives a management fee and an administration fee based on the net asset value of the Fund calculated on a daily basis and paid weekly.

MD Physician Services Inc. pays MD Management Limited, a related party, a fee for providing financial planning services.

Management Report of Fund Performance (June 30, 2011)

Past Performance

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each calendar year would have grown or decreased by the last day of each calendar year. Although the Fund's Series I units were created in 2009, they were not sold until 2010 and consequently for 2010 did not report a full financial year. As such the 2010 performance data is not available for the chart.

The performance information assumes that all distributions made by the Fund were reinvested in additional units of the Fund and does not take into account sales, redemptions, distributions or other optional charges that would reduce returns. How the Fund has performed in the past does not necessarily indicate how the Fund will perform in the future

Year-By-Year Returns

*For the six-month period ended June 30, 2011.

**Returns are for the 6 month period to June 30, 2011. Series I units do not charge a management fee at the fund level, and therefore may report higher returns. Series I units are available to qualified Institutional Investors who pay a separate negotiated management fee directly to MD Physician Services Inc.

¹ This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. The net assets per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in Note 2 of the Notes to Financial Statements. Net assets per unit are presented for 2007 through 2011, net asset values per unit are presented for 2006.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial year.

³ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

⁴ The results shown are for the period January 5 - December 31, 2010.

¹ This information is provided as at June 30 or December 31 of the period shown.

² Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. Effective July 1, 2010, goods and services tax ("GST") was replaced by the harmonized sales tax ("HST") in certain provinces and is applicable at higher rates than the GST. HST is being paid by the Fund and results in a higher MER than in previous years.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

⁴ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

⁵ The results shown are for the period January 5 - December 31, 2010.
