

MD International Growth Fund

Management Report of Fund Performance (June 30, 2011)

Series A, Series T and Series I

Results of Operations

For the period ending June 30, 2011, the MD International Growth Fund ("the Fund") generated a total return of 2.0%.

International equities carried forward positive momentum from 2010 to start the year off strong, but faltered in March in part due to the devastating earthquake and tsunami in Japan. April saw equities return to positive territory for the period, but uncertainty over the strength of the global economy and the return of sovereign debt concerns in Europe weighed on returns during May and June. For the six-month period ending June 30, 2011 the MSCI EAFE Index, which represents the aggregate common share returns of the largest non-North American developed world companies, gained 0.6% in local currencies or 2.4% in Canadian dollar terms. Other factors that affected the Fund's performance are summarized below.

Foreign currency exposure had a significant and positive impact on the Fund's performance over the first half of the year. The Euro and Swiss Franc were up strongly which benefited the Fund, although declines in the Japanese Yen offset some of the positive impact. The dynamic currency management program, introduced at the beginning of the year, added to performance over the period primarily by reducing exposure to the US and Hong Kong dollars which were both lower.

The significant majority of the Fund's investments were in Europe, with the remainder allocated between the developed nations of the Pacific Rim region and emerging markets. The United Kingdom, Germany and France received on average the largest country weightings. The majority of countries the Fund invested in contributed positively to the Fund's return. The largest positive contributions to return came from companies in Germany, France and South Korea. In contrast, companies in Japan, Hong Kong and Brazil detracted from the Fund's return.

Out of the nine industrial sectors represented in the portfolio, the Financials and Consumer Discretionary sectors received on average the highest portfolio weightings, while the Telecommunication Services and Information Technology sectors received the lowest allocation. Consumer Discretionary and Health Care positions were the largest positive contributors to the portfolio's return for the period. The Consumer Staples and Financial sectors were the only two sectors to detract from the portfolios return.

The investment style of the Fund is predominantly large-cap, with a growth bias. During the period the portfolio remained consistent to this style. The regional and sector weights in the Fund remained relatively consistent throughout the year.

As at June 30, 2011, the total net asset value of the Fund was \$208 million with no material change from the beginning of the year. Net investment income was up from higher dividend revenue and the Fund's assets produced net gains resulting in an overall increase in the net asset value from fund operations. However, this increase was offset by net redemptions to the Fund.

Recent Developments

Strategic Changes

There were no strategic changes to the Fund during the first half of the year and the Fund continues to be managed in manner consistent with its investment mandate. Overall, the Investment Advisors have adhered to their investment disciplines and the portfolio strategies are inline to achieve the long-term objectives of the Fund.

Related Party Transactions

MD Physician Services Inc. is the Manager, Registrar and Trustee of the Fund. As Manager, MD Physician Services Inc. manages the overall business of the MD Funds and is responsible for: setting investment objectives, providing and/or retaining the services of third party service providers for fund accounting services, administration services, and promoting the sales of the MD Fund's units.

As Registrar, MD Physician Services Inc. tracks the owners of units of the MD Funds, processes purchase, transfer and redemption orders, issues investor account statements, and issues annual tax reporting information.

As the Fund is organized as a Trust, investing in the Fund means purchasing units of the Trust. As Trustee to the Fund, MD Physician Services Inc. holds actual title to the property in the Fund—the cash and securities the Fund invests in—on behalf of the unitholders.

The principal distributor is MD Management Limited. As principal distributor, MD Management Limited markets the units of the MD Funds through its offices across Canada. MD Management Limited is owned by the Fund Manager, MD Physician Services Inc., which is owned by CMA Holdings (2009) Inc.

Management Fees

MD Physician Services Inc. provides the Fund with investment management and administrative services, including fund accounting and unitholder record-keeping. In return, MD Physician Services Inc. receives a management fee and an administration fee based on the net asset value of the Fund calculated on a daily basis and paid weekly.

MD Physician Services Inc. pays MD Management Limited, a related party, a fee for providing financial planning services.

(as a percentage of management fees)

Financial Planning Services	34.9%
Investment management, administration and other	65.1%

Disclosure

This interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the investment fund. You can obtain a copy of the interim financial statements at your request, and at no cost, by calling 1 800 267-2332, by writing to us at MD Physician Services Inc., 1870 Alta Vista Drive, Ottawa, Ontario, K1G 6R7, or by visiting our website at md.cma.ca or SEDAR at sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MD International Growth Fund

Management Report of Fund Performance (June 30, 2011)

Past Performance

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each calendar year would have grown or decreased by the last day of each calendar year. Although the Fund's Series I units were created in 2009, they were not sold until 2010 and consequently for 2010 did not report a full financial year. As such the 2010 performance data is not available for the chart.

The performance information assumes that all distributions made by the Fund were reinvested in additional units of the Fund and does not take into account sales, redemptions, distributions or other optional charges that would reduce returns. How the Fund has performed in the past does not necessarily indicate how the Fund will perform in the future.

Year-By-Year Returns

*For the six-month period ended June 30, 2011.

**Returns are for the 6 month period to June 30, 2011. Series I units do not charge a management fee at the fund level, and therefore may report higher returns. Series I units are available to qualified Institutional Investors who pay a separate negotiated management fee directly to MD Physician Services Inc.

Series T units are not reported here as they have been in existence for less than a full calendar year.

Regarding Forward-Looking Statements

This document contains forward-looking statements. Such statements are generally identifiable by the terminology used, such as "plan", "anticipate", "intend", "expect", "estimate", or other similar wording.

These forward-looking statements are subject to known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market and business conditions; fluctuations in securities prices; fluctuation in interest rates and foreign currency exchange rates; and actions by governmental authorities. Future events and their effects on the Fund may not be those anticipated. Actual results may differ materially from the results anticipated in these forward-looking statements.

Net assets—end of the period	\$9.87	\$9.90

¹ This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. The net assets per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in Note 2 of the Notes to Financial Statements. Net assets per unit are presented for 2007 through 2011, net asset values per unit are presented for 2006.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial year.

³ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

⁴ The results shown are for the period January 5 - December 31, 2010.

⁵ The results shown are for the period November 22 - December 31, 2010.

Net asset value per unit	\$7.57	\$7.44	Net asset value per unit	\$9.87	\$9.90

¹ This information is provided as at June 30 or December 31 of the period shown.

² Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. Effective July 1, 2010, goods and services tax ("GST") was replaced by the harmonized sales tax ("HST") in certain provinces and is applicable at higher rates than the GST. HST is being paid by the Fund and results in a higher MER than in previous years.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

⁴ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

⁵ The results shown are for the period January 5 - December 31, 2010.

⁶ The results shown are for the period November 22 - December 31, 2010.
